Antimicrobial Agents and Resistance

AAR03  Antifungal Agents and Resistance
AAR06  Novel Approaches: Therapies, Diagnostics and Drug Discovery
AAR07  Antimicrobial Pharmacokinetics, Pharmacodynamics and General
AAR08  New Antimicrobial Agents (pre-US IND or prior to the start of clinical therapeutic studies) and New Research Technologies
AAR09  Pharmacological Studies of Investigational Agents Pre-NDA (Phase 2/3)

Clinical Infections and Vaccines

CIV01  Clinical Studies of Adult Infectious Diseases, including Clinical Trials and Diseases caused by Bacteria, Viruses, Fungi, Prions or Parasites
CIV04  Transplant Infectious Diseases
CIV05  Pediatric Infectious Diseases
CIV06  Vaccines and Immunization Science

Clinical and Public Health Microbiology

CPHM02Antimicrobial Susceptibility Testing
CPHM06Diagnostic mycology

Host-Microbe Biology

HMB02  Genetic & Physiological Adaptation to the Host
HMB04  Cellular/Molecular Host-Microbe Interactions
HMB05  Invasion & Survival in Host Cells
HMB06  Manipulations of Host Functions by Microbes
HMB09  Microbiome-Host Interactions
HMB11  Polymicrobial Pathogenicity and Symbiosis
HMB13  Surface Structures of Pathogenic Microbes
HMB14  Toxins & Secreted Factors
HMB15  Virulence Regulatory Mechanisms
HMB18  Anti-Pathogen Strategies
HMB19  Vaccine Development
HMB20  Eukaryotic Microbe-Host Interactions

Molecular Biology and Physiology

MBP03  Biology of Eukaryotic Microbes
MBP04  Gene Regulation and Microbial Stress
MBP08  Biofilms
