NRCM EXAM DEVELOPMENT COMMITTEES (EDCs)

The primary responsibility of the EDCs is overseeing the development of all examination questions. The committee—

- ensures accuracy of questions in the exam question pool
- ensures there are a sufficient number of questions for each task
- ensures accuracy of documents available to examinees on http://www.asm.org/index.php/certification
- writes new exam questions
- locates images as needed
- reviews written examination questions
- reviews examination drafts and finalizes the exam
- reviews exam statistics and questions whose performance warrants review and, when necessary, identifies questions that should be removed from scoring

In addition, the EDC Chairs coordinate review of exam questions.

A balance of gender, geographic location, and institution type (e.g., hospital, public health, reference, etc.) is sought when selecting members to add to the Committees.

NRCM Registrants who serve on the EDCs are:

**SM: Biological Safety**
Joseph P. Kozlovac (Chair), Heather Blair, Patricia Delarosa, David Harbourt, Betsy Matos-Carrion, and Hsiang-Ming (Anthony) Wang
