ASM Conference on
Antibacterial Development

December 11–14 | Washington, DC

The ASM Conference on Antibacterial Development will provide a one-of-a-kind forum to facilitate cross pollination of ideas between government, academic, and industrial scientists whose research focuses on the three predominant means of combating bacterial infection: antibiotics, passive immunization, and active vaccination. Sessions will span the future of these fields, including advances in diagnostic approaches and understanding the impact of antimicrobial use in other areas.

Important Dates

October 3, 2016
Abstract Submission Deadline

November 3, 2016
Early Bird Registration Deadline

November 18, 2016
